HOURS

Our response time to every enquiry and after-sales request.

UK-Based Textile Sourcing & Supply

EcoNova Textiles supplies high-quality textile solutions to the healthcare, hospitality, retail and domestic sectors. Through a strategic partnership with an established manufacturer based in Pakistan, EcoNova combines UK-based commercial expertise and customer service with large-scale, certified production.

Customers get the agility of a UK business together with the scale, efficiency and reliability of a globally experienced manufacturer, with the flexibility to develop bespoke products and private-labels.

UK-Based Commercial Support

A dedicated UK account manager and a single point of contact for every customer.

Established Manufacturing Partner

Over two decades of production and export to Americas & EMEA.

Solar-Supported Production

Around 70% of the factory's energy needs are met by on-site solar power.

Factory-Direct Pricing

Competitive, transparent pricing through direct access to production.

Bespoke & Private Labels

Products, packaging and programmes developed to your specification and brand.

Secure Supply Chain

Consistent quality, shorter lead times and reliable, long-term supply.

Our Sectors

Specialist supplier to institutional and retail buyers.

Home Textile | **Hospitality** | **Healthcare**

“Your vision. Our expertise. Brought to life.”

HEALTHCARE

Hospital Gowns & Blankets

Durable textile solutions for healthcare environments, with fabrics, finishes and constructions designed to support comfort, hygiene and repeated commercial laundering.

Hospital Gowns

Comfortable, hygienic and practical patient wear

Designed to uphold patient dignity while improving healthcare efficiency. Durable, breathable, skin-friendly materials that withstand repeated high-temperature laundering.

RANGE

- Standard Patient Gowns
- Reusable Isolation Gowns
- Maternity Gowns
- Paediatric Gowns
- Surgical Gowns
- Reversible Gowns

SPECIFICATION

- 100% Cotton or Poly-Cotton Blends
- Thread Count: Customisable
- Finishes: Soft-touch or Antimicrobial Finish
- Wash Tempreture: According to Fabric Specification

Gown sizing	Size
Child	3 – 18 months
Adult	XS – 10XL

Hospital Blankets

Gentlest touch for the smallest patients

Designed for delicate infant skin - warm, soft, secure and durable enough for daily hospital use in maternity wards and paediatric units.

RANGE

- Adult Blankets
- Baby Cellular Blankets
- Muslin

SPECIFICATION

- 100% Cotton or 50/50 Cotton/Viscose or Cotton Flannel
- Finishes: Soft or Hypoallergenic Finish
- Breathable / Machine Washable
- Durable daily-use construction

Blanket	Size
Small Baby Cellular	70 x 90 cm
Large Baby Cellular	100 x 200 cm
Adult Cellular	180 x 230 cm

Hospital gowns and hospital blankets customisation available upon request

ECONOVA TEXTILES

Medical Scrubs & Bed Sheets

Medical Scrubs

Built for comfort and durability during long shifts

Functional, mobile and durable scrub suits for healthcare professionals: moisture-wicking, antimicrobial and reinforced for frequent use.

RANGE

- Sizes: S – XXL
- 100% Cotton or Cotton/Polyester Blends (CVC or PC)
- Fade and Shrink Resistant
- Reinforced Seams & Multiple Pockets

COLOUR CODING

- Blue / Green: Surgical and Clinical
- Yellow: Isolation / Infection Control
- Red / Orange: Emergency / High-risk
- White / Light: General and Diagnostic

Healthcare Bed Sheets

Premium hospital bed sheets for professional use

Resilient to repeated laundering while preserving softness and structural integrity. Built for hospitals, clinics and care facilities.

RANGE

- Flat Sheets
- Fitted Sheets
- Knitted Sheets
- Draw Sheets

SPECIFICATION

- 100% Cotton or Cotton/Polyester Blends (CVC or PC)
- Thread Count: Customisable
- Designed for repeated commercial laundering
- Wash Tempreture: According to Fabric Specification

Item	Size
Flat Sheet	137 x 183 cm
Flat Large Sheet	274 x 305 cm
Fitted Sheet	76 x 191 x 15 cm
King XL Sheet	290 x 305 cm
Pillowcase	53 x 89 cm
Pillowcase Large	107 x 117 cm

Custom medical scrubs and bed sheet sizes available upon request

Precision Where It Matters Most

Healthcare linen is not just fabric. It plays an important role in patient comfort, hygiene and operational performance. Working with our strategic partner, EcoNova can develop textile products to customer-specific requirements, including fabric composition, construction, thread count, dimensions, durability and laundering performance.

Where requirements go beyond our standard ranges, our team works directly with procurement and technical teams to develop the right manufacturing specifications.

Fabric composition	Construction	Thread count	Dimensions	Durability	Laundering performance

“In healthcare, comfort and care are woven together. Thread by thread, we support the hands that heal.”

We Build It With You

This brochure is a starting point, not the limit. No two collections are the same, and our direct partnership lets us develop exactly what you have in mind.

Any Composition or Blend

Whatever fibre, blend, thread count or construction your collection needs, our integrated manufacturing can develop it to your specification.

Private Label

Products and packaging tailored to your brand, for retail and institutional programmes.

Reference Sample Matching

Send us an existing product. Our team assesses its quality, composition and thread count to develop a comparable product at factory price.

Built Around UK Market

We work with you to understand your market, performance and commercial objectives, rather than simply supplying standard stock.

The EcoNova Supply Model

EcoNova capability	Customer benefit
Direct Manufacturing Access	Closer connection to production
UK-Based Commercial Support	Responsive local account management team
Bespoke Manufacturing	Products developed to your specification
Factory-Linked Pricing	Competitive and transparent sourcing
Private-Label Capability	Product and packaging tailored to your brand
Structured Sampling	Product evaluation before bulk production

If you can imagine it, we can build it together through our integrated manufacturing facility.

Sampling & After-Sales Support

Our Sampling Process

1 Fabric swatches
Small swatches are free of charge, so you can judge colour, weave and handle.

2 Reference sample assessment
Send an existing product and we will assess its quality, composition and thread count.

3 Full product samples
Available for evaluation, subject to specification and project requirements.

4 Turnaround time
Samples are typically dispatched within about 15 business days of confirming requirements.

5 Shipping
EcoNova covers domestic shipping. International shipping is quoted before dispatch.

6 Custom-development samples
A development fee may apply for bespoke blends, thread counts, colours or designs.

After-Sales Support

1 Dedicated account support
Every customer has a designated point of contact who can provide prompt, personalised assistance with post-delivery questions or concerns.

2 Quality assurance follow-up
If a product does not meet the agreed specifications, our team will investigate the matter promptly and work with you to reach a fair and practical resolution.

3 Responsive communication
We aim to answer every after-sales enquiry within 24 hours.

4 Repeat orders
Your order history makes repeat orders, specification changes and volume increases quick and accurate.

5 Long-term partnership
We treat every order as the start of a lasting relationship.

Sustainability & Accreditations

Through our manufacturing partnership, EcoNova supports customers seeking more responsible textile supply chains.

Our strategic partner has invested significantly in on-site solar generation, reducing reliance on conventional energy and lowering the environmental impact of textile manufacturing. Production waste is recycled where practicable, alongside ongoing work on resource efficiency and responsible packaging.

For customer-specific sustainability requirements, we work with our strategic partner to identify the right fibres, constructions, certifications and traceability for each programme.

~70%

of factory energy supported by on-site solar power

ISO 9001:2015 Quality Management System	An internationally recognised standard confirming the ability to deliver products that consistently meet customer and regulatory requirements.
Sedex Social Accountability	Membership of the Sedex ethical trade platform, supporting responsible and transparent business practices.
OEKO-TEX Class 1 Tested for Harmful Substances	Reduced carbon footprint, renewable energy adoption and recyclable packaging.
TSA Supply Partner Textile Services Association	EcoNova is a proud Supply Partner of the TSA, supporting the UK textile services industry with quality, sustainable and responsibly sourced textiles.

ISO 9001, Sedex and OEKO-TEX certifications are held by our manufacturing partner. Certification scope and current documentation are available upon request.

Let's Build Together

Great partnerships start with a conversation. From first sample to full-scale production, we deliver quality you can count on and lead times you can plan around. Whether you need a reliable manufacturing partner, custom fabric solutions or a sustainable supply chain built to last, we are ready to bring your vision to life.

WHAT'S NEXT FOR YOU?

1

Schedule a Call

Start with a conversation. Book a call with our UK account team to talk through your requirements, from product types and volumes to sustainability goals and lead times. Whether you're a linen rental business, a hotel group or a healthcare provider, we'll take the time to understand your needs and recommend the right products for you.

2

Request a Sample

Once we know what you need, we'll send you samples so you can see and feel the quality for yourself. Alternatively, you're welcome to send us your own samples so we can check the fabric, finish and construction first-hand before you commit to anything. It's the easiest way to be sure our products are the right fit for your business.

3

Get a Quote

We'll prepare a clear, competitive quote for anything from standard ranges to bespoke and private-label programmes, based on your specifications, quantities and delivery needs, with factory-direct pricing through our manufacturing partnership. We aim to respond to every quote request within 24 hours.
